

CONTENTS

PREFACE	vi
PART I	Prologue
	1 Basic Properties of Numbers 3
	2 Numbers of Various Sorts 21
PART II	Foundations
	3 Functions 39
	<i>Appendix. Ordered Pairs</i> 54
	4 Graphs 56
	<i>Appendix. Polar Coordinates</i> 75
	5 Limits 78
	6 Continuous Functions 101
	7 Three Hard Theorems 108
	8 Least Upper Bounds 119
	<i>Appendix. Uniform Continuity</i> 130
PART III	Derivatives and Integrals
	9 Derivatives 135
	10 Differentiation 154
	11 Significance of the Derivative 173
	<i>Appendix. Convexity and Concavity</i> 204
	12 Inverse Functions 215
	<i>Appendix. Parametric Representation of Curves</i> 229
	13 Integrals 233
	<i>Appendix 1. Riemann Sums</i> 262
	<i>Appendix 2. The Cosmopolitan Integral</i> 265
	14 The Fundamental Theorem of Calculus 268
	15 The Trigonometric Functions 286
	*16 π is Irrational 307
	17 The Logarithm and Exponential Functions 313
	18 Integration in Elementary Terms 336
